Don't Take a Seat for More Than 1 Hour

Are you tired of all the creams, pills, suppositories, and ointments that NEVER fix the true root issue?

- Sitting for a long time is not good for circulation.
- You should always stretch around to ensure that the blood flows smoothly even if you are at work.
- A hemorrhoid is likely to form if you create pressure on the bottom part by sitting for a longer time.

Eat Less Processed Foods

Processed foods increase the chances of constipation and other problems that cause hemorrhoids. This is because processed foods cause you to create harder stools that make digestion more difficult. Reduce your intake of processed foods and sugars if you are currently taking a lot daily.

Reduce the Use of Creams and Processed Medication

Most refined medicine do not treat the root of the problem, and include artificial and refined elements that may cause side effects. Creams are very ineffective as they do not treat the root of the hemorrhoid problem at all.
